

The Quest for the Best

Searching for Best Practices within our Network

The BIC community has continuously produced practices, methodologies and tools to promote and support innovative entrepreneurship in Europe and beyond. EBN is looking for ways to detect and disseminate this know-how throughout the whole network.

“The Quest for the Best” program will give you the opportunity to visit for a full day a BIC and to learn about its practices and tools, giving you the possibility to benchmark against it, to get new ideas for your BIC, as well as possibly creating long-lasting partnerships.

EBN will cover the travelling and accommodation expenses for one person... in return you will produce a “Best Practice Report” on the BIC and other deliverables decided on a case to case basis, that EBN will use for dissemination within the network members.
